

BODYFIT: ÍNTIMO, TÉCNICO, CONFORTABLE... DE NERI

El fabricante italiano sustancia a través de Bodyfit una línea de vestuario íntimo, apta como primera capa, realizada con material técnico novedoso, extremadamente elástico, suave y ligero, con un espesor y trama diferentes adaptados a cada zona del cuerpo para favorecer su adherencia y el ajuste perfecto. Prácticamente se han eliminado todas las costuras, y las que existen son planas e imperceptibles para mejorar el confort.

·Antibacteriano

El hilo de poliamida, transpirable con propiedades antibacterianas, controla la proliferación de gérmenes y bacterias, evitando el crecimiento de hongos, olores, rozaduras o eczemas cutáneos. Contribuye a la ligereza y suavidad de la prenda, asegurando un confort del máximo nivel.

·Termoregulación

Gracias a su elevada transpirabilidad, el propileno es un magnífico termo-regulador, por cuanto transporta el sudor de la parte interna a la externa de la prenda, facilitando su evaporación. De esta manera se mantiene una agradable temperatura corporal, al tiempo que la piel permanece seca. La presencia del elastano hace que la prenda sea extremadamente confortable y se consigue una mayor duración, manteniendo la forma y elasticidad por más tiempo, con la consiguiente mejora estética, aspecto clave para prendas que tienen vocación laboral pero se usan también en el tiempo de ocio. Destacamos productos como:

T-Shirt Body-Fit M/C. Código. 472060. Color negro. Camiseta de tejido técnico. Composición: 54% poliamida, 37% polipropileno, y 9% elastano, para un peso de 220 g/m². Tiene manga corta y cuello redondo. Es una prenda elástica y con perfecta adherencia al cuerpo, que queda liviana-mente ceñido por una ropa transpirable, suave, ligera y antibacteriana. La trama y la densidad del tejido son diferenciadas para las diferentes áreas según los requerimientos ergonómicos. Las costuras son planas, por lo que el usuario no las percibe ni padece molestia alguna. Tallas: S/M - L/XL - XXL/3XL

Calzamaglia Body-fit. Código. 472070 Color negro. Pantalón interior de tejido técnico: 54% poliamida, 37% polipropileno, 9% elastano. Entre otros rasgos destacables se encuentra su cintu-

rilla elástica que conforman una prenda flexible y con perfecta adherencia, transpirable, suave, ligera y resistente a la proliferación bacteriana para optimizar el confort y la estética. La trama y la densidad del tejido están diferenciadas por áreas. Costuras planas que no se perciben

Vestuario técnico profesional GreenBay®

Como complemento de una gama de vestuario de calidad y elevadas prestaciones, GreenBay®, marca de Neri s.p.A, situada en Corte Tegge di Cavriago (Reggio Emilia - Italia) ha desarrollado una nueva línea de seguridad pentavalente y de alta visibilidad para situaciones de luz escasa. Gracias a su alta visibilidad en las peores condiciones, las propiedades ignífuga, antiestática, anti-ácido, resistencia al arco eléctrico y a las salpicaduras de soldadura, con un único producto se satisface la necesidad de protección de muchos trabajadores en diferentes áreas laborales.

Cazadora Buffalo

Es una chaqueta Softshell ligera e innovadora, hecha con un tejido elástico técnico transpirable (94% poliéster / 6% elastano) que, aunque no

La cartera de productos de Neri, la más conocida en Italia, ocupa los primeros puestos en Europa gracias a una gama completa en constante actualización y a una excelente relación calidad / precio

BODYFIT: INTIMATE, TECHNICAL, COMFORTABLE ... BY NERI

The Italian manufacturer expresses through Bodyfit an intimate clothing line, suitable as a first layer, made with new technical material, extremely elastic, soft and light, with a different thickness and weft adapted to each area of the body to promote its adhesion and perfect adjustment. Practically all seams have been removed, and those that exist are flat and imperceptible to improve comfort.

·Antibacterial

The polyamide thread, breathable with antibacterial properties, controls the proliferation of germs and bacteria, preventing the growth of fungi, odors, scabs or cutaneous eczemas. It contributes to the lightness and softness of the garment, ensuring a comfort of the highest level.

·Thermoregulation

Thanks to its high breathability, propylene is a great thermo-regulator, since it transports the sweat from the inside to the outside of the garment, facilitating its evaporation. This maintains

a pleasant body temperature, while the skin remains dry. The presence of the elastane makes the garment extremely comfortable and allows a longer life, maintaining the shape and elasticity for longer, with a consequent aesthetic improvement, a key aspect for garments that have a labour purpose but are also used in leisure time. Are noteworthy products:

·Body-Fit M/C T-Shirt. Code. 472060. Color black. Technical fabric t-shirt. Composition: 54% polyamide, 37% polypropylene, and 9% elastane, for a weight of 220 g / m². It has short sleeve and round neck. It is an elastic garment with perfect adherence to the body, which is lightly tightened by a breathable, soft, light and antibacterial garment. The weave and the density of the fabric are differentiated for the different areas according to the ergonomic requirements. The seams are flat, so the user does not perceive them or suffer any discomfort. Sizes: S / M - L / XL - XXL / 3XL

·Calzamaglia Body-fit. Code. 472070 Color black. Technical fabric inner trousers: 54% polyamide, 37% polypropylene, 9% elastane. Among other notable features are its elastic waistband that conforms a flexible garment with perfect

adherence, breathable, soft, light and resistant to bacterial proliferation as per optimize comfort and aesthetics. The weft and density of the fabric are differentiated by areas. Flat seams not perceived.

GreenBay® technical professional garments by Neri.

To complete a quality and high performing line of workwear, GreenBay®, a trademark of Neri s.p.a, located in Cavriago (Reggio Emilia - Italy) has developed a new "pentavalent" safety line intended for conditions of low light. Thanks to its high visibility even in the lowest possible conditions, its fire-static-acid resistance and its protection against electrical arc and welding processes, this single product is able to meet the protection needs of many workers in different areas of application.

·Buffalo jacket

The Buffalo jacket is an innovative lightweight Softshell, made with a breathable, technical stretch fabric (94% polyester / 6% elastane) which, although not padded, provides excellent protection from the weather elements (rain, wind, moisture). Moreover it dries very quickly, making it very versatile and appreciated not only at workplace but also for leisure time. This advanced style with polyurethane internal membrane, provides protection from the cold and moisture while maintaining high breathability.

It is able to maintain the body heat and at the same time to transfer the moisture outside, so as to leave the body dry and the temperature under control. On the inside, the microfleece is very soft and warm for greater comfort. Its main features are: colour blue or black. Weight 310 g/m². 2 waist pockets with zipper. 1 zipper pocket on the left arm. 2 inner waist pockets. Front zipper fastener and stand-up collar. All zipper tab in contrasting color. Sizes from S to XXXL. It lends itself well for customization with corporate logo. It is also available the version designed specifically for woman (art. Barrie) with the same features, to ensure a modern fit.

Neri's product portfolio, the best known in Italy, is among the leading positions in Europe due to a comprehensive and constantly updated and extremely good value for money
